

**IN THE CLAIMS:**

1. (Currently Amended) A content synchronization system of similar Web pages comprising:

a basic Web page specify portion that receives an identifier of a basic Web page as a Web page to be a basis of display and specifies the basic Web page;

5 a compared Web site specify portion that receives an identifier of a compared Web site as a compared object of the basic Web page and specifies the compared Web page;

a keyword extract portion that extracts a keyword in the basic Web page specified by the basic Web page specify portion;

10 a similar Web page finding portion that specifies one or multiple similar Web pages that are similar to an entire part or a part of the basic Web page in the compared Web sites based on the keyword extracted by the keyword extract portion; and

a Web page display control portion that displays the similar Web pages specified by the similar Web page finding portion together with the basic Web page and synchronized with an operation to the basic Web page,

15 wherein when the operation is performed by a user on the basic Web page, the Web page display control portion displays in a synchronized manner a same type of operation being performed on the similar Web page.

2. (Original) The content synchronization system of similar Web pages described in claim 1, and further comprising a word frequency calculate portion that calculates frequency of a word in an entire or a part of a Web page and the keyword extract portion extracts a word whose

frequency is not less than a predetermined threshold from words that appear in the basic Web  
5 page as the keyword.

3. (Previously Presented) The content synchronization system of similar Web pages described in claim 1, wherein the word frequency calculate portion specifies a part of speech of each word by a Morphological analysis and calculates the word frequency by multiplying a number of each word appearance by a weight factor that has been previously determined.

4. (Original) The content synchronization system of similar Web pages described in claim 1, and further comprising a Web page analyze portion that divides a title, a subtitle and a content sentence of a Web page by analyzing a structure of the Web page.

5. (Previously Presented) The content synchronization system of similar Web pages described in claim 4, wherein the keyword extract portion extracts a first keyword from words contained in the title and the subtitle and considers the first keyword as a subject keyword and also extracts a second keyword from words contained in the content sentence and considers the  
5 second keyword as a content keyword,

the similar Web page finding portion searches a title and a subtitle of the compared Web page based on the subject keyword or searches a content sentence of the compared Web page based on the content keyword and extracts a similar Web page from a result of the above.

6. (Original) The content synchronization system of similar Web pages described in claim 1, wherein the similar Web page finding portion considers a Web page that is the most similar to the basic Web page among the compared Web pages as the similar Web page.

7. (Previously Presented) The content synchronization system of similar Web pages described in claim 6, wherein the similar Web page finding portion considers a paragraph from the compared Web page that contains keywords over a predetermined number as a similar paragraph, and considers a compared Web page with a largest number of paragraphs judged as  
5 the similar paragraph, as the similar Web page.

8. (Original) The content synchronization system of similar Web pages described in claim 1, wherein the Web page display control portion displays the basic Web page and the similar Web page on a same window.

9. (Original) The content synchronization system of similar Web pages described in claim 1, wherein the Web page display control portion displays a part of the similar Web page that is similar to the part displayed out of the basic Web page.

10. (Previously Presented) The content synchronization system of similar Web pages described in claim 1, wherein the Web page display control portion displays a word in the similar Web page that is the same as a word that is selected in the basic Web page in a mode different from other words in the similar Web page.

11. (Previously Presented) The content synchronization system of similar Web pages described in claim 1, and further comprising:

5 a difference Web page finding portion that specifies a difference Web page as a Web page having difference information that is contained in the basic Web page and that is not contained in the similar Web page from the compared Web site; and

a difference Web page display portion that makes it possible to display one or multiple difference Web pages specified by the difference Web page finding portion together with the basic Web page and the similar Web page simultaneously.

12. (Previously Presented) The content synchronization system of similar Web pages described in claim 11, wherein the difference Web page display portion displays the difference Web page in a form of an icon and the difference Web page is displayed by a predetermined operation applied to the icon.

13.-14. (Cancelled)

15. (Currently Amended) A content synchronization method of similar Web pages comprising

a basic Web page specify step that receives an identifier of a basic Web page as a Web page to be a basis of display and specifies the basic Web page;

5 a compared Web site specify step that receives an identifier of a compared Web site as a Web page to be compared of the basic Web page and specifies the compared Web page;

a keyword extract step that extracts a keyword in the basic Web page specified by the basic Web page specify step;

10 a similar Web page extract step that extracts one or multiple similar Web pages that are similar to an entire part or a part of the basic Web page in the compared Web sites based on the keyword extracted by the keyword extract step; and

a Web page display control step that displays the similar Web pages extracted by the similar Web page extract step together with the basic Web page simultaneously,

wherein a part of the similar Web page that is similar to the part displayed out of  
15 the basic Web page is displayed in the Web page display control step and when the part of the  
basic Web page is scrolled, the part of similar Web page that is similar to the part of the basic  
Web page is scrolled.

16.-17. (Cancelled)

18. (Currently Amended) The content synchronization system of similar Web pages  
described in claim [[10]] 1 wherein the word in the similar Web page that is the same as the  
word that is selected in the basic Web page is highlighted.

19. (Cancelled)

20. (New) A content synchronization system of similar Web pages comprising:  
a basic Web page specify portion that receives an identifier of a basic Web page  
as a Web page to be a basis of display and specifies the basic Web page;  
a compared Web site specify portion that receives an identifier of a compared  
5 Web site as a compared object of the basic Web page and specifies the compared Web page;  
a keyword extract portion that extracts a keyword in the basic Web page specified  
by the basic Web page specify portion;  
a similar Web page finding portion that specifies one or multiple similar Web  
pages that are similar to an entire part or a part of the basic Web page in the compared Web sites  
10 based on the keyword extracted by the keyword extract portion; and

a Web page display control portion that displays the similar Web pages specified by the similar Web page finding portion together with the basic Web page and synchronized with an operation to the basic Web page,

when the part of the basic Web page is scrolled, the Web page display control portion scrolls the part of similar Web page that is similar to the part of the basic Web page.

21. (New) A content synchronization method of similar Web pages comprising:

a basic Web page specify step that receives an identifier of a basic Web page as a Web page to be a basis of display and specifies the basic Web page;

5 a compared Web page specify step that receives an identifier of a compared Web site as a Web page to be compared of the basic Web page and specifies the compared Web page;

a keyword extract step that extracts a keyword in the basic Web page specified by the basic Web page specify step;

a similar Web page extract step that extracts one or multiple similar Web pages that are similar to an entire part or a part of the basic Web page in the compared Web sites based 10 on the keyword extracted by the keyword extract step; and

a Web page display control step that displays the similar Web pages extracted by the similar Web page extract step together with the basic Web page simultaneously,

wherein when the operation is performed by a user on the basic Web page in the Web page display control step, a same type of operation being performed on the similar Web 15 page is performed in a synchronized manner.
